NARAPOGU UDAY CHARAN RUDRA

+91 9154948056 | Khammam, Telangana, India | narapogurudra@gmail.com | **LinkedIn**: RudraNarapogu

PROFESSIONAL SUMMARY

Software Engineering student focused on building scalable engineering solutions, maintaining large-scale systems, and developing AI-integrated software. Proficient in full-stack development, database optimization, and cloud-native infrastructure design. Proven ability to analyze complex data, evaluate results, and collaborate across functional teams to solve real-world engineering challenges.

TECHNICAL SKILLS

Hard Skills: Software Engineering, AI-integrated Software Development, Large-scale Systems Maintenance, High-performance Application Development, System Infrastructure Design & Deployment, Python, Java, C, JavaScript, Django, REST API, HTML5, CSS3, Bootstrap, MySQL, SQL, Machine Learning Lifecycle, Data Preprocessing, Exploratory Data Analysis, Git, GitHub, VS Code, Cloud Computing Fundamentals.

Soft Skills: Problem-Solving & Analytical Thinking, Cross-Functional Collaboration, Effective Communication, Leadership, Adaptability & Initiative.

WORK EXPERIENCE

Full Stack Developer Intern | Crimson Innovative Technologies Pvt. Ltd. | May 2024 - Oct 2024

• Engineered modules for an Employee Task Management System; optimized MySQL queries and schemas, reducing data retrieval latency by 15%. • Designed and deployed scalable engineering solutions to support high-performance application requirements. • Collaborated across functional teams to debug complex system infrastructure, fostering a culture of reliability and technical innovation.

Data Science & Machine Learning Intern | Upskill Campus | May 2026 - May 2026

• Developed and evaluated supervised ML models, achieving a 25% improvement in data processing efficiency via optimized feature engineering. • Maintained large-scale data pipelines and performed rigorous exploratory data analysis to drive actionable system insights.

TECHNICAL PROJECTS

Vehicle Service Booking Website (Django, MySQL, HTML,CSS)

• Architected end-to-end infrastructure for automated service scheduling; optimized backend logic to handle large-scale concurrent user requests. • Implemented system maintenance protocols, ensuring 99% availability during peak traffic loads.

Employee Task Management System (Django, MySQL, JS)

• Designed a scalable task assignment engine to support enterprise-level workflows. • Integrated AI-driven notification logic, enhancing team productivity by 20% through efficient, data-backed task prioritization.

EDUCATION

B.Tech – CSE (Data Science) | Swarna Bharathi Institute of Science & Technology | 2025–2028

Diploma – Cloud Computing & Big Data | Government Institute of Electronics | 2022–2025 | CGPA: 8.6/10

LEADERSHIP & COMMUNITY

• **Google Student Ambassador (2026)**: Spearheaded technical workshops, actively supporting peers and promoting the developer ecosystem on campus.

• **GDG Community Member**: Collaborated with cross-functional developers on AI and cloud computing initiatives, demonstrating versatility and a passion for learning.
